

Immigration and Credit in America

J. Anthony Cookson¹, Benedict Guttman-Kenney², & William Mullins³

¹University of Colorado Boulder, ²Rice University, ³University of California San Diego

Federal Reserve Bank of Philadelphia Consumer Finance Institute, 9 September 2025

TransUnion (the data provider) has the right to review the research before dissemination to ensure it accurately describes TransUnion data, does not disclose confidential information, and does not contain material it deems to be misleading or false regarding TransUnion, TransUnion's partners, affiliates or customer base, or the consumer lending industry.

- Immigrants to the U.S. bring their labor market experiences (e.g., education records, work history, human capital) helping them to navigate U.S. labor markets

- Immigrants to the U.S. bring their labor market experiences (e.g., education records, work history, human capital) helping them to navigate U.S. labor markets
- Immigrants start life in the U.S. *without* a U.S. credit report
 - Any foreign credit history generally unobserved to U.S. lenders

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

Data

- Representative anonymized sample of U.S. consumer credit reporting data, 2000 to 2024
- Data **matched** with information on whether a consumer is an **immigrant**, & **year of immigration**, using sequential Social Security Number (SSNs) assignment

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

Data

- Representative anonymized sample of U.S. consumer credit reporting data, 2000 to 2024
- Data **matched** with information on whether a consumer is an **immigrant**, & **year of immigration**, using sequential Social Security Number (SSNs) assignment

What We Do

- Describe **selection** of Immigrants compared to Non-Immigrants in their creditworthiness
- Describe **assimilation** in creditworthiness & access to credit over life cycle
- How **dynamics** of life cycle outcomes vary by one year difference in age of immigration, conditional on birth year & geographic fixed effects

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

Data

- U.S. consumer credit reporting data matched with immigration data

What We Do

- Describe **selection** of Immigrants & **assimilation** dynamics over life cycle
 - Compare same-age Immigrants vs. Non-Immigrants, Immigrants arriving at different ages

Immigrants (vs. Non-Immigrants), Immigrants Arriving At Older (vs. Younger) Ages:

- **Positive selection:** More creditworthy (once credit scored)
- **Delayed entry** into credit system
- **Lower long-term access** to auto loans **due to debt aversion**
- Credit card limits are **lower** but become **higher over time**

Our Paper Contributes To Labor Economics & Household Finance Literatures

- Prior work shows the large positive contribution of legal immigrants to U.S. economy (e.g., Sequeira, Nunn, & Qian, 2020; Kerr & Kerr, 2020; Azoulay, Jones, Kim, & Miranda, 2022; Bernstein, Diamond, McQuade, Jiranaphawiboon, & Pousada, 2025)
- We show the **selection** of immigrants based on their credit behaviors, complementing work focusing on labor market outcomes (e.g., Borjas, 1987; Abramitzsky & Boustan, 2017)
- We show **assimilation** into the U.S. credit markets over life cycle, complementing work on labor & cultural assimilation (e.g., Borjas, 1985; Abramitzsky et al., 2014, 2020, 2021; Lubotsky, 2007; Bleakley & Chin, 2010; Doran, Geber, & Isen, 2022; Bailey et al., 2022)
- We contribute to the household finance literatures on economics of credit information, & credit use across the life cycle that largely has not studied role of immigrants (e.g., Pagano & Jappelli, 1996; Dobbie et al., 2021; Blattner, Hartwig, & Nelson, 2022; Zillessen, 2022; Bach et al., 2023; Ricks & Sandler, 2025; Bakker et al., 2025)

Roadmap For Presentation

1. Data & Institutional Details
2. Credit Market Entry
3. Creditworthiness
4. Credit Access
5. Mechanisms

Data & Institutional Details

University of Chicago Booth TransUnion Consumer Credit Panel (BTCCP)

- Anonymized data sample of 1 in 10 consumers with U.S. credit reports
- Monthly data from 2000 to 2024
- Individual tradeline data (e.g., details on each account, including opening dates) & consumer-level data (e.g., birth date, credit score, ZIP code)

Gibbs, Guttman-Kenney, Lee, Nelson, van der Klaauw & Wang
(2025, *Journal of Economic Literature*)

University of Chicago Booth TransUnion Consumer Credit Panel (BTCCP)

- Anonymized data sample of 1 in 10 consumers with U.S. credit reports
- Monthly data from 2000 to 2024
- Individual tradeline data (e.g., details on each account, including opening dates) & consumer-level data (e.g., birth date, credit score, ZIP code)

Gibbs, Guttman-Kenney, Lee, Nelson, van der Klaauw & Wang
(2025, *Journal of Economic Literature*)

American Community Survey (ACS), 2010

- Validate our immigration classification

Survey of Consumer Finances (SCF), 2022

- Evaluate mechanisms behind our results

Classifying Immigrants In The BTCCP

Before 2012, U.S. Social Security Administration assigned first 5 digits of the 9-digit Social Security Numbers (SSNs) sequentially within states (Puckett, 2009)

Consumers assigned SSNs as adults are very likely to be (legal) immigrants

- validated in prior work (Klopfer & Miller, 2024; Yonker, 2017; Doran, Gelber, & Isen, 2022; Bernstein, Diamond, McQuade, Jiranaphawiboon, & Pousada, 2025)
- **“Immigrants”**: assigned SSN at age 21+. **“Non-Immigrants”**: assigned SSN at age < 21

Classifying Immigrants In The BTCCP

Before 2012, U.S. Social Security Administration assigned first 5 digits of the 9-digit Social Security Numbers (SSNs) sequentially within states (Puckett, 2009)

Consumers assigned SSNs as adults are very likely to be (legal) immigrants

- validated in prior work (Klopfer & Miller, 2024; Yonker, 2017; Doran, Gelber, & Isen, 2022; Bernstein, Diamond, McQuade, Jiranaphawiboon, & Pousada, 2025)

- **“Immigrants”**: assigned SSN at age 21+. **“Non-Immigrants”**: assigned SSN at age < 21

Classifying Immigrants In The BTCCP

1. Created lookup table: map first 5 digits of SSN to SSN assignment year (*SSN Year*)
2. Sent to TransUnion: (i) lookup table (ii) list of anonymous consumer identifiers in BTCCP
3. TransUnion merged to their non-anonymous data that includes SSNs. TransUnion returned consumer SSN Year (without SSNs) linked to anonymous consumer identifiers
4. We calculate age of SSN assignment: $SSN\ Age = SSN\ Year - Birth\ Year$

Entrant Sample In BTCCP

Sample Restrictions

- Birth years 1975 - 1987
- SSN Ages 0 to 29 (21 to 29 “Immigrants”)
- Credit report by 2011

Entrant Sample

6,122,932 consumers

– 344,261 (5.6%) “Immigrants” (ACS: 6.6% includes illegal)

Follow credit outcomes in BTCCP for ages 18 to 40

- Immigrant credit access may be adversely affected by **information frictions**:
 1. **Not having a credit report on arrival**
 - **Lender's prior:** Consumer with no U.S. credit report is **high credit risk**
 2. **After entering the credit system, have a shorter history than Non-Immigrants**
 - Length of credit report has positive impact to credit scores ($\approx 15\%$ FICO)

Institutional Details On Lending In America

- Immigrant credit access may be adversely affected by **information frictions**:
 1. **Not having a credit report on arrival**
 - **Lender's prior:** Consumer with no U.S. credit report is **high credit risk**
 2. **After entering the credit system, have a shorter history than Non-Immigrants**
 - Length of credit report has positive impact to credit scores ($\approx 15\%$ FICO)
- Different cultural **tastes** & informational barriers for consumers
 - Differences in familiarity & willingness to use debt, understanding of how to build credit score
- Lenders use credit scores (+ other information) in decisions
 - Can use immigration status
 - Cannot use protected characteristics (e.g., gender, national origin, race)
under Equal Credit Opportunity Act (ECOA)

Credit Market Entry

SSN Assigned At Older Age $\rightarrow$ Later Entry Into U.S. Credit System

$$Y_i = \phi_{SSN\ Age(i)} + \mu_{b(i)} + \epsilon_i \quad (1)$$

Main Cross-Sectional Regression Specification

Cross-Sectional OLS Regression:

$$Y_i = \phi_{SSN\ Age(i)} + \mu_{b(i)} + \epsilon_i \quad (1)$$

Given **linearity** in *SSN Age*, focus on simpler regression:

$$Y_i = \beta_1 \cdot \mathbb{I}\{SSN\ Age\ 21+\}_i + \beta_2 \cdot SSN\ Age_i + \mu_{b(i)} + \epsilon_i \quad (2)$$

β_1 : average difference for Immigrants vs. Non-Immigrants

β_2 : marginal difference for SSN Age one year later

Cluster standard errors by birth year

Today's results also include fixed effects for geographic controls ($\eta_{g(i)}$):

- First observed ZIP5, Last observed ZIP5, Longest-held ZIP5, & number of ZIP5s

Immigrants, & Older SSN Age Immigrants, Enter Credit Market Later Than Non-Immigrants & Younger SSN Age Immigrants

$$Y_i = \beta_1 \cdot \mathbb{I}\{SSN\ Age\ 21+\}_i + \beta_2 \cdot SSN\ Age_i + \mu_{b(i)} + \eta_{g(i)} + \epsilon_i \quad (2)$$

Age at First...	Credit Report (1)	Credit Product (2)
21+	1.692*** (0.073)	1.477*** (0.088)
SSN Age	0.727*** (0.014)	0.689*** (0.016)
F.E. Birth Year	X	X
F.E. Geographic Controls	X	X
R ²	0.323	0.192
Mean, SSN Age <21	19.86	21.25

$N = 6,122,932$, *** 0.5%, **, 1%, * 5% statistical significance

Creditworthiness

Once Scored, Immigrants Have Higher Credit Scores Than Non-Immigrants

A. Any Credit Score

Once Scored, Immigrants Have Higher Credit Scores Than Non-Immigrants

A. Any Credit Score

B. Mean Credit Score

Immigrants (vs. Non-Immigrants) +16 points average scores by age 30, +22 by age 40

C. Prime or Higher Credit Score (660+)

Positive Selection Of Immigrants In Credit Score Distribution

C. Prime or Higher Credit Score (660+)

D. Prime or Higher Credit Score (Conditional on Any Score)

Immigrants (vs. Non-Immigrants) have more compressed credit scores:

↓ Pr(subprime), ↑ Pr(superprime)

Immigrants (vs. Non-Immigrants) Have More Creditworthy Behaviors: Lower Delinquency Rates & Lower Credit Card Utilization

A. Any Delinquency

Immigrants (vs. Non-Immigrants) Have More Creditworthy Behaviors: Lower Delinquency Rates & Lower Credit Card Utilization

A. Any Delinquency

B. Credit Card Utilization Rate

Immigrants (vs. Non-Immigrants) Are More Creditworthy: 5% Lower Delinquency Rates At Age 37 Conditional On Age 30 Credit Score

Immigrants (vs. Non-Immigrants) Are More Creditworthy: 5% Lower Delinquency Rates At Age 37 Conditional On Age 30 Credit Score

21+	-0.0140*** (0.0041)
SSN Age	-0.0004 (0.0005)
F.E. Birth Year	X
F.E. Age 30 Zip5	X
F.E. Age 30 Credit Score	X
R^2	0.185
N	5,755,134
Mean, SSN Age <21	0.2722

Credit Access

Immigrants Persistently Less Likely To Hold Auto Loans (& Mortgages)

A. Any Auto Loan

Immigrants Persistently Less Likely To Hold Auto Loans (& Mortgages)

A. Any Auto Loan

B. Any Mortgage

By Age 37...

- Immigrants are 4.43 (s.e. 0.20) p.p., 6% *less* likely to have auto loan vs. Non-Immigrants
- Each year older SSN Age is 1.06 (0.11) p.p. *less* likely to have auto loan
- Each year older SSN Age is 1.56 (0.09) p.p. *less* likely to have mortgage

Each Year Later in Life SSN Age Delays First Accessing Mortgage, Auto Loan, & Credit Card By 0.4 to 0.6 Years

$$Y_i = \beta_1 \cdot \mathbb{I}\{\text{SSN Age } 21+\}_i + \beta_2 \cdot \text{SSN Age}_i + \mu_{b(i)} + \eta_{g(i)} + \epsilon_i \quad (2)$$

Age at First...	Auto Loan (1)	Mortgage (2)	Credit Card (3)
21+	1.424*** (0.136)	-0.082 (0.052)	1.195*** (0.125)
SSN Age	0.540*** (0.023)	0.406*** (0.017)	0.644*** (0.019)
F.E. Birth Year	X	X	X
F.E. Geographic Controls	X	X	X
R^2	0.169	0.154	0.159
Mean, SSN Age <21	29.15	36.36	22.68

$N = 6,122,932$

“Paired Cohorts”: Comparing Immigrants vs. One Year Younger SSN Age (Immigrants With Same Birth Year)

$$Y_{k(p),t} = \sum_{\tau=-1}^{+13} \delta_{\tau} (\mathbb{I}\{\text{focal cohort}\}_{k(p)} \times \mathbb{I}\{t = \tau\}) + \pi_{k(p)} + \nu_{p,t} + \epsilon_{k(p),t} \quad (3)$$

- ‘Focal Cohort’: $SSN\ Age_c$, 22-30
- ‘Control Cohort’: $SSN\ Age_c - 1$, same birth year as focal. 68 pairs (p)
- 2,176 cohort-by-year observations ($k(p), t$), s.e. clustered by birth year

“Paired Cohorts”: Comparing Immigrants vs. One Year Younger SSN Age (Immigrants With Same Birth Year)

$$Y_{k(p),t} = \sum_{\tau=-1}^{+13} \delta_{\tau} (\mathbb{I}\{\text{focal cohort}\}_{k(p)} \times \mathbb{I}\{t = \tau\}) + \pi_{k(p)} + \nu_{p,t} + \epsilon_{k(p),t} \quad (3)$$

- ‘Focal Cohort’: $SSN\ Age_c$, 22-30
- ‘Control Cohort’: $SSN\ Age_c - 1$, same birth year as focal. 68 pairs (p)
- 2,176 cohort-by-year observations ($k(p), t$), s.e. clustered by birth year
- **Results:**

Any Auto Loan after 10 years:

−0.46 p.p., −0.42 cumulative years

Any Mortgage after 10 years:

−0.92 p.p., −0.29 cumulative years

Immigrants' Credit Card Limits Are Initially Lower Than Non-Immigrants, But Become Higher Than Non-Immigrants Over Life Cycle

A. Credit Card Limits (\$)

Similar patterns for number of credit cards,
credit card limit per card

(Taking out credit cards to build credit

– Kovrijnykh, Livshits, & Zetlin-Jones, 23)

Immigrants' Credit Card Limits Are Initially Lower Than Non-Immigrants, But Become Higher Than Non-Immigrants Over Life Cycle

Conclusions

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

Study **selection & assimilation dynamics** over life cycle of Immigrants vs. Non-Immigrants
- exploit variation in age of immigration in credit data matched with immigration information

Immigrants (vs. Non-Immigrants), & Immigrants arriving at older ages:

- **Positively selected:** more creditworthy (once scored)
- **Delayed entry** into credit system
- **Lower long-term access** to auto loans **due to debt aversion**
- Credit card limits are **lower** but become **higher over time**

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

- exploit variation in age of immigration in credit data matched with immigration information

Immigrants (vs. Non-Immigrants), & Immigrants arriving at older ages:

- **Positively selected:** more creditworthy (once scored)
- **Delayed entry** into credit system
- **Lower long-term access** to auto loans **due to debt aversion**
- Credit card limits are **lower** but become **higher over time**

Implication is that immigrants are profitable to lend to. Potential solutions?

- **FinTech innovations** (e.g., AmEx Global Card Relationship, NovaCredit, Global Credit File)
- **Removing barriers** to lending to immigrants or sharing information across borders
- **Shorten duration** for retaining positive information on credit reports, but this has trade-offs (e.g., Blattner, Nelson, & Hartwig, 2022; Kovbasyuk & Spagnolo, 2024)

Thank You!

Distribution of Immigrants by...

A. Birth Year

Immigrant Classification Aligns With American Community Survey (ACS) 🚀

Distribution of Immigrants by...

A. Birth Year

B. Immigration Age

BTCCP: 11.27% SSN Age 21+

ACS: 10.2% Immigrated at Age 21+

Distribution of immigrants aligns by geography. Immigrants more mobile than non-immigrants.

“Entrant Sample”: Restrict To Birth Years 1975 - 1987 To Observe U.S. Entry At Ages 21 To 29 & Credit Outcomes For Ages 18 To 40 🍷

TransUnion Consumers	
... born 1951 to 2004	31,869,445
... with a SSN in TransUnion	25,237,917
 Clean Sample	 18,572,654
... SSN Age <21	16,478,940
... SSN Age 21+	2,093,714 (11.27%)
... Immigrant Cohorts (Birth Year x SSN Year)	775
 Entrant Sample (SSN Age < 30)	 6,122,932
... SSN Age < 21	5,778,671
... SSN Age 21-29	344,261 (5.62%)
... Immigrant Cohorts (Birth Year x SSN Year)	102

Geographic Comparison of Immigrants: ACS vs. BTCCP 🚀

Immigrant Classification in Entrants Sample: ACS vs. BTCCP

A. Non-Immigrants and Immigrants by Immigration Age

B. Immigrants by Immigration Age

BTCCP: 5.62% SSN Age 21 to 29

ACS: 6.57% Immigrated at Age 21 to 29

Geographic Mobility 🚀

A. Any ZIP1 Move

B. Any ZIP5 Move

SSN Ages By Birth Year

A. Before Cleaning

B. After Cleaning

Paired Cohorts: Credit Cards 🚀

A. Number Of Credit Cards

B. Credit Card Limits (\$)

Potential Mechanism #2: Emigration

Proxy emigration by **attrition** from data

Immigrants exit data more than Non-Immigrants

- If arrive earlier, on average, exit data earlier, so can't explain paired cohort results

Potential Mechanism #2: Emigration

Proxy emigration by **attrition** from data

Immigrants exit data more than Non-Immigrants

- If arrive earlier, on average, exit data earlier, so can't explain paired cohort results

Restrict to consumers observed in 2024:

- **Mortgage** Immigrant vs. Non-Immigrant gap closes but SSN Age gap remains
- **Auto loan** Immigrant vs. Non-Immigrant gap & SSN Age gap remains
- **Credit card** dynamics by SSN Age remains

Does Lower Credit Demand Explain Lower Access?

Immigrants Have Higher Credit Demand In 20s, Lower Demand In 30s 🚀

A. Months Since Last Credit Inquiry
Higher Value = Lower Credit Demand

B. Paired Cohorts
Months Since Last Credit Inquiry

Caveat: Lower credit demand in 30s may be function of earlier rejections → deterrence

Inconclusive Evidence On Other Demand and Supply Proxies (SCF, 2022)
