

Immigration and Credit in America

J. Anthony Cookson¹, Benedict Guttman-Kenney², & William Mullins³

¹University of Colorado Boulder, ²Rice University, ³University of California San Diego

New Zealand Finance Meeting, 14 December 2025

TransUnion (the data provider) has the right to review the research before dissemination to ensure it accurately describes TransUnion data, does not disclose confidential information, and does not contain material it deems to be misleading or false regarding TransUnion, TransUnion's partners, affiliates or customer base, or the consumer lending industry.

- Immigrants to the U.S. bring their labor market experiences (e.g., education records, work history, human capital) helping them to navigate U.S. labor markets

- Immigrants to the U.S. bring their labor market experiences (e.g., education records, work history, human capital) helping them to navigate U.S. labor markets
- Immigrants start life in the U.S. *without* a U.S. credit report
 - Any foreign credit history generally unobserved to U.S. lenders

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

Data

- Representative anonymized sample of U.S. consumer credit reporting data, 2000 to 2024
- Data **matched** with information on whether a consumer is an **immigrant**, & **year of immigration**, using sequential Social Security Number (SSNs) assignment

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

Data

- Representative anonymized sample of U.S. consumer credit reporting data, 2000 to 2024
- Data **matched** with information on whether a consumer is an **immigrant**, & **year of immigration**, using sequential Social Security Number (SSNs) assignment

What We Do

- Describe **selection** of Immigrants compared to Non-Immigrants in their creditworthiness
- Describe **assimilation** in creditworthiness & access to credit over life cycle
- How **dynamics** of life cycle outcomes vary by one year difference in age of immigration, (with fixed effects for birth year & ZIP5 geography)

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

Data

- U.S. consumer credit reporting data matched with immigration data

What We Do

- Describe **selection** of Immigrants & **assimilation** dynamics over life cycle
 - Immigrants vs. same-age Non-Immigrants & Immigrants arriving at different ages

Immigrants (vs. Non-Immigrants), Immigrants Arriving At Older (vs. Younger) Ages:

- **Positive selection:** More creditworthy (once credit scored)
- Despite better creditworthiness, **lower long-term access** to auto loans & mortgages

Timing of immigration best explains our results (“history dependence”)

Our Paper Contributes To Labor Economics & Household Finance Literatures

- Prior work shows the large positive contribution of legal immigrants to U.S. economy (e.g., Azoulay et al., 2022; Bernstein et al., 2025)
- We show the **selection** of immigrants based on their credit behaviors, complementing work focusing on labor market outcomes (e.g., Borjas, 1985; Abramitzsky & Boustan, 2017)
- We show **assimilation** into the U.S. credit markets over life cycle, complementing work on labor & cultural assimilation (e.g., Borjas, 1985; Abramitzsky et al., 2014, 2020, 2021; Lubotsky, 2007; Bleakley & Chin, 2010; Doran, Geber, & Isen, 2022; Bailey et al., 2022)
- We contribute to the household finance literature that has largely not studied immigrants (e.g., Dobbie et al., 2021; Zillessen, 2022; Bakker et al., 2025; Gorback & Schubert, 2025)

Roadmap For Presentation

1. Data & Institutional Details
2. Credit Market Entry
3. Creditworthiness
4. Credit Access
5. Mechanisms

Data & Institutional Details

University of Chicago Booth TransUnion Consumer Credit Panel (BTCCP)

- Anonymized data sample of 1 in 10 consumers with U.S. credit reports
- Monthly data from 2000 to 2024
- Individual tradeline data (e.g., details on each account, including opening dates) & consumer-level data (e.g., birth date, credit score, ZIP code)

Gibbs, Guttman-Kenney, Lee, Nelson, van der Klaauw & Wang
(2025, *Journal of Economic Literature*)

University of Chicago Booth TransUnion Consumer Credit Panel (BTCCP)

- Anonymized data sample of 1 in 10 consumers with U.S. credit reports
- Monthly data from 2000 to 2024
- Individual tradeline data (e.g., details on each account, including opening dates) & consumer-level data (e.g., birth date, credit score, ZIP code)

Gibbs, Guttman-Kenney, Lee, Nelson, van der Klaauw & Wang
(2025, *Journal of Economic Literature*)

American Community Survey (ACS), 2010

- Validate our immigration classification

Survey of Consumer Finances (SCF), 2022

- Evaluate mechanisms behind our results

Classifying Immigrants In The BTCCP

Before 2012, U.S. Social Security Administration assigned first 5 digits of the 9-digit Social Security Numbers (SSNs) sequentially within states (Puckett, 2009)

Consumers assigned SSNs as adults are very likely to be (legal) immigrants

- validated in prior work (Klopfer & Miller, 2024; Yonker, 2017; Doran, Gelber, & Isen, 2022; Bernstein et al., 2025)
- **“Immigrants”**: assigned SSN at age 21+. **“Non-Immigrants”**: assigned SSN at age < 21

Classifying Immigrants In The BTCCP

Before 2012, U.S. Social Security Administration assigned first 5 digits of the 9-digit Social Security Numbers (SSNs) sequentially within states (Puckett, 2009)

Consumers assigned SSNs as adults are very likely to be (legal) immigrants

- validated in prior work (Klopfer & Miller, 2024; Yonker, 2017; Doran, Gelber, & Isen, 2022; Bernstein et al., 2025)

- **“Immigrants”**: assigned SSN at age 21+. **“Non-Immigrants”**: assigned SSN at age < 21

Classifying Immigrants In The BTCCP

1. Create lookup table mapping first 5 digits of SSN to SSN assignment year (*SSN Year*)
2. TransUnion merged to their data & returned SSN Year (no SSNs) for each consumer
3. We calculate age of SSN assignment: $SSN\ Age = SSN\ Year - Birth\ Year$

Classifying Immigrants In The BTCCP

Before 2012, U.S. Social Security Administration assigned first 5 digits of the 9-digit Social Security Numbers (SSNs) sequentially within states (Puckett, 2009)

Consumers assigned SSNs as adults are very likely to be (legal) immigrants

- validated in prior work (Klopfer & Miller, 2024; Yonker, 2017; Doran, Gelber, & Isen, 2022; Bernstein et al., 2025)

- **“Immigrants”**: assigned SSN at age 21+. **“Non-Immigrants”**: assigned SSN at age < 21

Classifying Immigrants In The BTCCP

1. Create lookup table mapping first 5 digits of SSN to SSN assignment year (*SSN Year*)
2. TransUnion merged to their data & returned SSN Year (no SSNs) for each consumer
3. We calculate age of SSN assignment: $SSN\ Age = SSN\ Year - Birth\ Year$

Entrant Sample Of Birth Years 1975 to 1987 With SSN Ages 0 to 29:

6,122,932 consumers – 344,261 (5.6%) “Immigrants” (ACS: 6.6% includes illegal)

Follow **credit outcomes** in BTCCP for **ages 18 to 40**

- Immigrant credit access may be adversely affected by **information frictions**:
 1. **Not having a credit report on arrival**
 - **Lender's prior:** Consumer with no U.S. credit report is **high credit risk**
 2. **After entering the credit system, have a shorter history than Non-Immigrants**
 - Length of credit report has positive impact to credit scores ($\approx 15\%$ FICO)

- Immigrant credit access may be adversely affected by **information frictions**:
 1. **Not having a credit report on arrival**
 - **Lender's prior:** Consumer with no U.S. credit report is **high credit risk**
 2. **After entering the credit system, have a shorter history than Non-Immigrants**
 - Length of credit report has positive impact to credit scores ($\approx 15\%$ FICO)
- Different cultural **tastes** & informational barriers for consumers
 - Differences in familiarity & willingness to use debt, understanding of how to build credit score
- Lenders use credit scores (+ other information) in decisions
 - Can use immigration status, can't use protected characteristics (e.g., national origin, race) under Equal Credit Opportunity Act (ECOA)

Credit Market Entry

Main Cross-Sectional Regression Specifications

β_1 : average difference for Immigrants vs. Non-Immigrants from OLS regression:

$$Y_i = \beta_1 \cdot \mathbb{I}\{Immigrant\}_i + \mu_{b(i)} + \eta_{g(i)} + \epsilon_i \quad (1)$$

- Includes fixed effects: birth year ($\mu_{b(i)}$) and geography based on first ZIP5 ($\eta_{g(i)}$)

Main Cross-Sectional Regression Specifications

β_1 : average difference for Immigrants vs. Non-Immigrants from OLS regression:

$$Y_i = \beta_1 \cdot \mathbb{I}\{Immigrant\}_i + \mu_{b(i)} + \eta_{g(i)} + \epsilon_i \quad (1)$$

- Includes fixed effects: birth year ($\mu_{b(i)}$) and geography based on first ZIP5 ($\eta_{g(i)}$)

β_2 : marginal difference for SSN Age one year later, from OLS regression:

$$Y_i = \beta_1 \cdot \mathbb{I}\{Immigrant\}_i + \beta_2 \cdot SSN\ Age_i + \mu_{b(i)} + \eta_{g(i)} + \epsilon_i \quad (2)$$

- Cluster standard errors by birth year

Immigrants, & Older SSN Age Immigrants, Enter Credit Market Later Than Non-Immigrants & Younger SSN Age Immigrants

	Age at First Credit Report	
	(1)	(2)

“Paired Cohorts”: Comparing Immigrants vs. One Year Younger SSN Age (Immigrants With Same Birth Year)

$$Y_{k(p),t} = \sum_{\tau=-1}^{+13} \delta_{\tau} (\mathbb{I}\{\text{focal cohort}\}_{k(p)} \times \mathbb{I}\{t = \tau\}) + \pi_{k(p)} + \nu_{p,t} + \epsilon_{k(p),t} \quad (3)$$

- ‘Focal Cohort’: $SSN\ Age_c$, 22-30
- ‘Control Cohort’: $SSN\ Age_c - 1$, same birth year as focal. 68 pairs (p)
- 2,176 cohort-by-year observations ($k(p), t$), s.e. clustered by birth year

“Paired Cohorts”: Comparing Immigrants vs. One Year Younger SSN Age (Immigrants With Same Birth Year)

$$Y_{k(p),t} = \sum_{\tau=-1}^{+13} \delta_{\tau} (\mathbb{I}\{\text{focal cohort}\}_{k(p)} \times \mathbb{I}\{t = \tau\}) + \pi_{k(p)} + \nu_{p,t} + \epsilon_{k(p),t} \quad (3)$$

- ‘Focal Cohort’: $SSN\ Age_c$, 22-30
- ‘Control Cohort’: $SSN\ Age_c - 1$, same birth year as focal. 68 pairs (p)
- 2,176 cohort-by-year observations ($k(p), t$), s.e. clustered by birth year
- **Results:**

Any Auto Loan after 10 years:

−0.46 p.p., −0.42 cumulative years

Any Mortgage after 10 years:

−0.92 p.p., −0.29 cumulative years

Immigrants' Credit Card Limits Are Initially Lower Than Non-Immigrants, But Become Higher Than Non-Immigrants Over Life Cycle

A. Credit Card Limits (\$)

Similar patterns for number of credit cards,
credit card limit per card

Immigrants' Credit Card Limits Are Initially Lower Than Non-Immigrants, But Become Higher Than Non-Immigrants Over Life Cycle

A. Credit Card Limits (\$)

Similar patterns for number of credit cards,
credit card limit per card

B. Paired Cohorts

SSN Age +2 Years:

-\$1,825 (s.e. \$105)

SSN Age +13 Years:

+\$707 (s.e. \$162)

Mechanisms

What Mechanisms Explain?

- Less Credit For More Creditworthy Immigrants
- Less Credit For Later In Life Immigrants

Creditworthiness

Emigration

Credit Demand & Tastes

History Dependence

- Credit History Dependence: Financial friction of no U.S. credit report & shorter history
- Non-Credit History Dependence: less time in U.S. means...
 - fewer years of U.S. earnings
 - less far along in American life cycle

Immigrants Are Averse To Purchasing Cars With Debt (SCF, 2022)

-19% Immigrants Vs. Non-Immigrants

Non-Portability Of Credit Histories Across National Boundaries May Prevent Profitable Lending. Recent Market Solutions To Increase Credit Access:

American Express Global Card Relationship

Nova Credit

International credit data

Credit Passport® gives you access to foreign consumer-permissioned credit data that's translated to a local equivalent score to serve the 2 million immigrants that arrive in the United States each year and 280 million immigrants worldwide.

Equifax Canada Global Consumer Credit File

Global Consumer Credit File

Helping you grow and retain your clients who are newcomers to Canada

Global Consumer Credit File provides lenders with a seamless and secure platform that connects with global credit bureaus and enables accurate and informed decisioning through robust data.

Conclusions

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

Study **selection & assimilation dynamics** over life cycle of Immigrants vs. Non-Immigrants
- exploit variation in age of immigration in credit data matched with immigration information

Immigrants vs. same age Non-Immigrants & Immigrants arriving at older ages:

- **Positively selected:** more creditworthy (once scored)
- Despite better creditworthiness, **lower long-term access** to auto loans & mortgages
 - Lower mortgage access explained by timing of immigration
 - Lower auto loan access also due to auto loan-specific debt aversion
- *Timing* of immigration best explains our results (“**history dependence**”)

How Do Immigrants Assimilate Into The Formal U.S. Consumer Credit System?

Study **selection & assimilation dynamics** over life cycle of Immigrants vs. Non-Immigrants

Paired Cohorts: Credit Cards 🚀

A. Number Of Credit Cards

B. Credit Card Limits (\$)

Potential Mechanism #2: Emigration

Proxy emigration by **attrition** from data

Immigrants exit data more than Non-Immigrants

- If arrive earlier, on average, exit data earlier, so can't explain paired cohort results

Potential Mechanism #2: Emigration

Proxy emigration by **attrition** from data

Immigrants exit data more than Non-Immigrants

- If arrive earlier, on average, exit data earlier, so can't explain paired cohort results

Restrict to consumers observed in 2024:

- **Mortgage** Immigrant vs. Non-Immigrant gap closes but SSN Age gap remains
- **Auto loan** Immigrant vs. Non-Immigrant gap & SSN Age gap remains
- **Credit card** dynamics by SSN Age remains

Use Survey of Consumer Finances (SCF) 2022 To Evaluate Mechanisms

SCF 2022 includes if Immigrant & Age of Immigration

Adapt earlier cross-sectional regression to this data:

$$Y_i = \beta_1 \cdot \mathbb{I}\{Immigrant\}_i + \beta_2 \cdot Immigration\ Age_i + \mu_{b(i)} + \eta_{d(i)} + \epsilon_i$$

$\eta_{d(i)}$ are F.E. Demographic Controls: male, race, hispanic, spouse, male spouse, marital status, household size, number of children, education levels, & quintiles of household wage income

Use Survey of Consumer Finances (SCF) 2022 To Evaluate Mechanisms

SCF 2022 includes if Immigrant & Age of Immigration

Adapt earlier cross-sectional regression to this data:

$$Y_i = \beta_1 \cdot \mathbb{I}\{\text{Immigrant}\}_i + \beta_2 \cdot \text{Immigration Age}_i + \mu_{b(i)} + \eta_{d(i)} + \epsilon_i$$

$\eta_{d(i)}$ are F.E. Demographic Controls: male, race, hispanic, spouse, male spouse, marital status, household size, number of children, education levels, & quintiles of household wage income

SCF Debt Attitude Questions:

“People have many different reasons for borrowing money which they pay back over a period of time. For each of the reasons I read, please tell me whether you feel it is all right for someone like yourself to borrow money...to finance the purchase of a car.”

Immigrants More Likely To Buy Cars With Cash (SCF, 2022)

12.5 p.p. [95% C.I. -2.2, 27.3], 17% Vs. Non-Immigrants

Credit inquiries data in credit panel shows
↑ immigrant credit demand in 20s, ↓ demand in 30s

Does Lower Credit Demand Explain Lower Access?

Immigrants Have $\uparrow$ Credit Demand In 20s, $\downarrow$ Demand In 30s 🚀

A. Months Since Last Credit Inquiry
Higher Value = Lower Credit Demand

B. Paired Cohorts
Months Since Last Credit Inquiry

Caveat: Lower credit demand in 30s may be function of earlier rejections $\rightarrow$ deterrence

Inconclusive Evidence On Other Demand and Supply Proxies (SCF, 2022)
